Introduction

The review articles and original research selected for this bibliography come from the New Zealand Family Violence Clearinghouse database, the Australian Domestic and Family Violence Clearinghouse database and research selected from other sources. The main focus of most of this research is on the association between alcohol use and misuse and intimate partner violence. However, it includes some literature which covers other forms of family violence including child abuse, and sexual violence. Research on family violence and other substance use and misuse has been included where available.

This bibliography was last updated as indicated.

Overview

The key issues and complexities in relation to the association between alcohol use and intimate partner violence are outlined in these issues papers.

Social Policy Evaluation and Research Unit (2015).

Reducing the impact of alcohol on family violence (What works paper). Wellington, New Zealand: Superu.

Online at: www.superu.govt.nz

Bennett, L., & Bland, P. (2008).

Substance abuse and intimate partner violence (Applied Research paper). Harrisburg, PA: VAWnet, a project of the National Resource Center on Domestic Violence.
