What people have said about this workshop:

100% of participants made crucial changes to improve their child protection policies and procedures

100% of participants have a better understanding of the legislation and government changes around keeping children safe

"Professional, engaging and child centred"

"Practical and hands on"

"Excellent workable methods to evaluate current policy and easily identify areas that need to be improved and the resources needed to implement these changes"

"This course highlighted the importance of procedure and policy, what should be included and how these procedures act as a reinforcer to those using them, that they are doing the right thing. The course also highlights that clear outlines make the difference often between whether a person would follow through with a concern or not"
